

INDEX

S.No	List of Practicals	Date	Signature
1	Write a python code for implementing Single Player Game.		
2	Unguided Search Techniques: a. Write a python code for implementing Water Jug Problem using BFS.		
3	Guided Search Techniques: a. Write a python code for implementing 8 Puzzle Problem using Best First Search. b. Write a python code for implementing 8 Puzzle Problem using A* Search algorithm.		
4	Write a python code for Optimal Problem-Solving using AO* Algorithm.		
5	Write a program to implement Tic-Tac-Toe game problem		
6	Constraint Satisfaction: a. Write a python code for implementing Cryptarithmic problem. b. Write a python code for implementing Graph colouring problem.		
7	Game Playing in AI: a. Write a python code for implementing Min Max Algorithm b. Write a python code for implementing Alpha Beta Pruning Algorithm c. Write a python code for implementing a game using minmax with Alpha Beta Pruning.		
8	Machine Learning: a. To implement data pre-processing techniques including handling missing values, normalization/standardization, and feature encoding on a given dataset. b. To build and evaluate a Linear Regression model for predicting continuous outcomes using an appropriate real-world dataset.		
9	Natural Language Processing: a. Data Cleaning using NLTK Toolkit.		

	b. To implement Frequency-Based Word Embedding Techniques Bag of Words 2. TF-IDF		
10	Fuzzy Logic: a. To design a fuzzy inference system to estimate the house price based on house size and location quality using Python.		
11	Open Ended Experiment
